

A woman in a dark sports top is in a low, ready position, holding a barbell with large black weights. She is looking down at the bar. In the background, another person is bent over, also working with a barbell. The gym floor is covered with dark rubber mats. The lighting is dramatic, with a strong light source from the left creating a bright glow around the woman's head and casting long shadows.

TECHNOAH BV

WHO WE ARE

Technoah BV has been supplying the market for many years with sustainable and high quality products. Our expertise is the design and production of various rubber and plastic products. Technoah BV produces the products quickly on its own production lines in the Netherlands and Europe. Both locally, nationally and internationally we supply from stock or according to customer-specific requirements in small or large series.

We offer our customers the best quality products. Product improvement or change is done from our own perspective and in close cooperation with our clients. In addition to designing and producing custom-made (customized) products, we offer a wide range of standard products. All our products undergo strict quality and reliability tests according to ISO 9001 and are produced in a responsible and environmentally friendly manner.

Technoah BV believes in sustainability with respect to the environment but also in the relationship with you. We are convinced that the key to success lies in the personal approach and optimal relationship with our customers. For the best result of a project, Technoah BV likes to think along with you!

We would like to introduce ourselves to you.

SPORT & LEISURE

RUBBER FLOORING & PRODUCTS

Rubber floors are very suitable for the fitness industry. Due to the (critical) damping property of rubber it is not only a comfortable feeling to sport on rubber tiles, the sound is also reduced. From strength training to cardio exercises, a rubber floor is ideal.

Technoah BV has been specialized in rubber floors for years and can advise you well. From (extra) hard pressed to adding extra glue, Technoah BV offers solutions for every application.

Product properties:

- Anti slip
- Maintenance-friendly
- Easy installation
- Heavy duty possible
- Noise reduction
- Protection of the subfloor
- Insulating effect
- Sustainable
- Multifunctional applicable
- Various options
- Standard products and customized

EN1177:2008

**Made in
the EU**

recycled rubber

ENVIRONMENT

Recycling

Our rubber products consist of rubber SBR granules in a specific particle size granulation. The source are worn car tires. These car tires are removed by a shredder; after which the canvas and metal are removed. Then the rubber granules are cleaned and sieved out in the right proportion and then mixed with polyurethane glue. In this way a new product is created.

INSTALLATION

Maintenance and cleaning

Place the rubber products on a hard / flat surface. The rubber tiles can optionally be cut to size with a sharp knife or a jigsaw with coarse teeth. Ideal processing temperature is between 5°C and 25°C. At high and low temperatures, elongation or shrinkage may occur.

Tiles of 500x500mm should preferably be laid in half-brickwork in connection with a possible gradient. Tiles from 45mm thickness are provided with a pin-hole connection. The thicker tiles can be glued together.

Clean the rubber floors and produce with a PH neutral detergent.

RUBBER QUALITY

SBR and EPDM

SBR: Styrol Butadiene Rubber is the basic quality of the rubber tiles. It is made UV and ozone resistant by means of (colored) polyurethane glue. The rubber tiles can also be produced with an EPDM (Ethylene Propylene Diene Monomer) top layer. EPDM is colourfast and is a virgin material.

WARRANTY

Production process and testing

The manufacturer declares that all products are produced in a responsible and environmentally friendly manner. Our rubber products are manufactured according to a controlled production process. The right ratio of polyurethane adhesive and clean rubber granules guarantee the highest possible quality. Apart from the very good experiences, the rubber tiles have been extra tested on the following points: HIC-value (Head Injury Criterion); wear resistance and PAK values.

A one-year warranty is given on production faults. The final lifespan strongly depends on usage and location. Given the experiences and test results it will be a few years.

FITNESS CROSSFIT

Rubber flooring program

FITNESS-PUZZLE TILE

Dimensions [mm] and weight [kg] Fitness-puzzle tile	540 × 540 × 10mm 540 × 540 × 20mm	10mm= 2,30 kg per piece 20mm= 4,75 kg per piece
Fitness-side tile	540 × 270 × 10mm 540 × 270 × 20mm	10mm= 1,15 kg per piece 20mm= 2,38 kg per piece
Fitness-corner tile	270 × 270 × 10mm 270 × 270 × 20mm	10mm= 0,58 kg per piece 20mm= 1,19 kg per piece
Quality	SBR rubber granules 975gr/ liter - Dense pressing	
Colors	Black and grey or other colors possible on request 	
Benefits	Anti slip Maintenance-friendly Easy installation Comfortable to train on Heavy duty (from 20mm) Protection of the subfloor Insulating effect Unique puzzle connection system	
Application	Sports areas With regard to HIC values (critical drop heights) and outdoor applications, other thicknesses are possible on request.	
Packaging	Fitness-puzzle tiles of 10mm are packed per 100m ² (400 tiles) Fitness-puzzle tiles of 20mm are packed per 50m ² (200 tiles) Side and corner-tiles can be ordered individually.
